

APP IDEA & COMPETITIVE ANALYSIS

Bessy

A free, privacy-first companion app for Schoology grades

THE PROBLEM

Schoology's own app is clunky. The leading third-party fix, StudyBuddy, locks grade notifications, widgets, and live sync behind a \$4.99/mo subscription.

THE SOLUTION

Bessy gives every Schoology student the same tools — What-If grade calculator, trend charts, notifications, a home-screen widget — for free, processed entirely on-device.

THE APP IDEA

How Bessy Works — Architecture & Roadmap

Sign in with Schoology (OAuth 1.0a)

Students log in on Schoology's own page — the app never sees a password, and school SSO (Google/Microsoft) still works.

Grades processed on-device

Data is fetched straight to the phone and cached locally; nothing is stored on a Bessy server.

One registered app, every student self-authorizes

A single developer key covers all schools — no per-district IT approval needed, the same model StudyBuddy uses today.

MVP

- Grade list, color-coded
- What-If calculator
- Dark mode
- Pull-to-refresh sync

v1.0 — Parity

- Final-grade calculator
- Grade trend charts
- GPA / multi-term rollup
- Assignment calendar

v1.x — Differentiators

- Grade-change notifications
- Home-screen widget
- Goal tracking
- Weighted-category visualizer

DIFFERENTIATION

What Makes Bessy Unique

Pro Features, Zero Cost

The only app in this space giving away notifications, widgets, and live sync free — no \$4.99/mo tier required.

Privacy as Architecture, Not a Promise

Grades are parsed and cached on-device by design; no central database of student grades exists to be breached.

Goal Tracking

Set a target grade per class and see exactly what's needed on remaining work — no competitor above offers this.

Weighted-Category Visualizer

Shows which grading category is actually moving the final grade — a desktop-extension-grade tool, on mobile.
